

## Young Gardeners Win Many Prizes

### Exhibit in Agricultural Building Shows Fine Results of Training of School Children

Exhibits of vegetables grown in the school gardens and in the home gardens of pupils in the schools filled the greater part of one end in the Agricultural building of the Fair Grounds Saturday. It was the first children gardeners' fair and exceeded anything that had been hoped for and was so fine a success that it is intended to make such an event an annual fixture. It was decided upon by the children themselves after they had been told they could hold it or not as they wished but that if they decided to hold it, then it was up to them to make it a success or let it be a fizzle for lack of interest on their part.

#### Many Gardens Represented

There were 299 separate exhibits entered by Maui schools and school children for the first children's fair. The home gardens far exceeded in number of entries those of the school gardens and in matter of quality there was little to choose. In both quantity and quality the exhibits far exceeded anything that had been expected. James Lindsay, one of the judges said the display compared most favorably with those he has seen at the annual county fairs, that in neatness of putting up the entries it was in many respects superior and he complimented the youngsters highly upon both quality and quantity of their showing of produce.

Some of the exhibits began to come in Friday and Saturday morning they came thick and fast. R. C. Bowman, supervisor of vocational training was there to receive them and he and volunteer assistants who included Supervising Principal Wells and several of the school principals had a busy morning arranging the produce. At the sides and end of the building were the home garden exhibits divided into four classes according to the grades of the schools in which are the young home gardeners. On the platform in the center, directly in front of the door were the school garden displays.

#### Blue Ribbons Give Out

So many exhibits were entered and so great was the variety, combined with the fact that there were really five sections, that in some instances there was little competition. It was thought unfair to have the younger

gardeners compete against the older but as a matter of fact there was often little to choose. But the arrangement permitted and required the awarding of a larger number of prizes and as a result the blue ribbons that had been provided gave out quickly and to designate the first awards those in charge of the display were put to it. They secured some of the first prizes cards from the last fair to indicate winnings and when those were exhausted used the same cards the judges had used to indicate their choice.

#### Judges Get Busy

From 10 o'clock until the judges started to work, about 11:30 numbers were in the building looking over the fine showing and again after the awards had been made many came in and all were outspoken in surprise and commendation. The judges were James Lindsay, F. B. Cameron, W. H. "Pop" Hutton and J. H. Gray and they had a busy hour and a half of it. Riley H. Allen, editor of the Honolulu Star Bulletin, had come over from Honolulu to attend the fair. He and his paper are chiefly responsible for the gardening movement in the schools and at the homes of the pupils. For several years the paper has been conducting annual contests in all of the islands. He took a number of pictures which included a group of the gardeners from Ulupalakua school, winner of the Class B, Cup. At that time the award had not yet been made.

Puunene won the Class A cup largely because of the larger and more diversified exhibits it made. Ulupalakua won Class B and deserved especial credit because it had no garden last year and had made a late start this year. Keokea was unable to show vegetables because its garden was washed out and is behind in produce because of its having to start all over again only a few weeks ago but it made up for lack of vegetables in a beautiful display of flowers.

## Oxford and Cambridge Have to Call For Aid

LONDON, April 4 — (Associated Press Mail)—Oxford and Cambridge Universities, for the first time in their long histories, are unable to support themselves and have called upon the public for assistance.

This was disclosed in a report issued by the Royal Commission appointed under the chairmanship of ex-premier Asquith to investigate the financial condition of the two institutions, which two years ago was admittedly so unsatisfactory that the government granted each of them an emergency subsidy of £30,000 annually, thus saving both colleges from collapse.

Including these subsidies, Oxford had an income of £824,710 in 1920, while that of Cambridge totalled £719,554. The Commission's report recommends increasing the annual grants to £100,000 each, with additional provisions for extending educational facilities for women and paying pension arrears.

The commission stresses the point that today the universities have largely returned to their original function of ministering to the non-wealthy student, and have, in fact, become "student democracies."

In addition to recommending ample facilities for the education of women, the report pleads for more state scholarships, cheaper living costs and better pay, with pension prospects, for professors.

Although the report regrets "the comparative neglect of living languages" at both universities, it notes that there is an increasing tendency on the part of businessmen to look to universities for trained men as future assistants and partners. It adds that "business salaries now offered to first-class science men would make it impossible to keep enough of the best men to do the teaching at Oxford and Cambridge were it not for their devotion to academic research and teaching and their attachment to the university."

As regards the cost of living for undergraduates, the report finds that it is too high. In 1919-20 the average total year's cost for an arts student, including food but not clothes, washing, books, stationery and personal expenses, was £156 for Oxford and £145 for Cambridge. The cheapest college during the year was Oxford £114; Cambridge £123. The dearest was at Oxford, £202; Cambridge £172.

Marquis Curzon is chancellor of Oxford, where the number of resident undergraduate students according to the latest statistics is 4,651, while at Cambridge, where Sir Arthur Balfour is chancellor, there are 5,733 students.

## Grand Circuit Stakes Are Highest Known in Years

CLEVELAND, O., April 20—(Associated Press)—Harness horse activities and interest of Grand Circuit followers here are centered in North Randall race track where spring training will commence soon following the usual winter jogging. More than 150 trotters and pacers are now quartered at the track where the first Grand Circuit meeting of the season will be held the week of July 3. That number will soon be augmented as many stables are due to ship their horses here to complete their training for the circuit meetings.

The stake program for the July Grand Circuit meeting at North Randall is identical with that of 1921. It includes the Ohio, 2:08 trot, valued at \$5,000; the Tavern "Steak," 2:14 trot, valued at \$5,000, the Fasig, three year old trot with \$2,000 value; the Trotting Sweepstakes for 2:05 horses with \$1,500 added money and the Edwards, 2:08 pace, value \$3,000.

The entries for these events have already closed, each drawing a great list of nominations.  
The stake list for the July meeting carries a total money valuation of \$16,500.

Seven stakes are listed for the second meeting at North Randall, the week of August 7, with a total money valuation of \$22,500, said to be the richest stake program mapped out for any six days of harness racing in 1922.

## THE FENCE THAT SERVES

If you have been accepting the dictates of rust, and paying your good money for wire fences that need continual repairing, you should be told about Armeo fence wire. In the first place, Armeo wire is 99.84 per cent commercially pure. This means that it is close-grained, without air holes or interior weaknesses of any sort. Thus your old enemy rust can do nothing but put a light coat of corrosion on its surface and the middle remains strong and firm. Armeo wire is of high tensile strength. It will serve you well.

There is an Armeo product for every purpose where iron is used.
